

Year 6

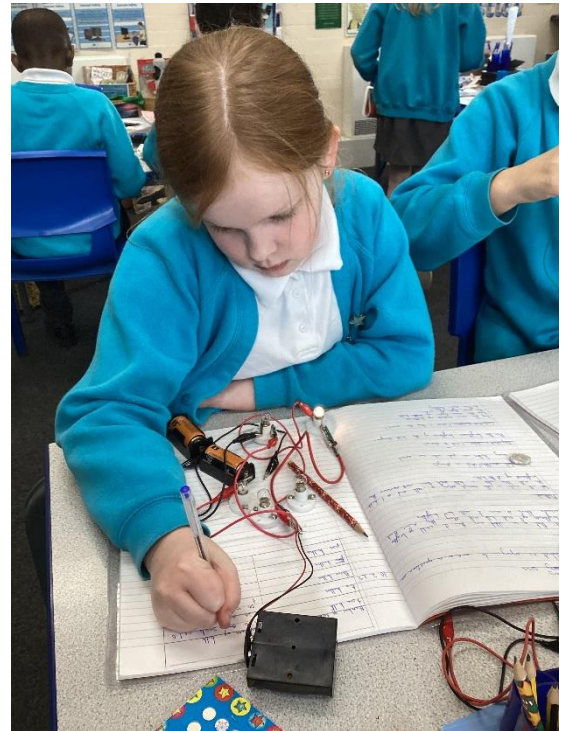

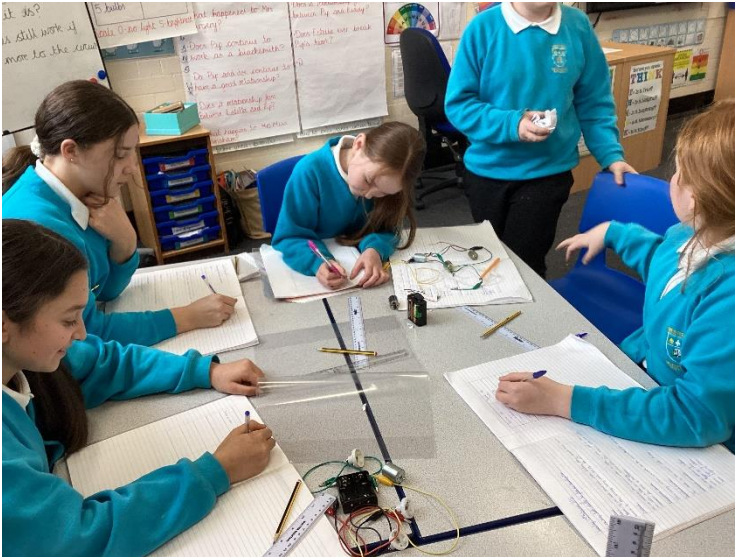

We have had so much fun exploring pop art, within our topic on America, this term. We explored artists Roy Lichtenstein and Andy Warhol- looking at what inspired them and creating our own art in their style. We used Ben-day dots to create self-portraits and printed to create our own style of silk-screen print of every day 'popular items'.

We raised money and awareness of The Brain Tumour Research Charity by wearing a hat to school.

In science, we have been looking at the topics light and electricity and have investigated many different questions looking carefully at variables to ensure our tests have been fair.

We had a fantastic Science Day and were absolutely wowed by the visitor from The Royal Institution! She showed us how we found the energy within different foods and how much exercise we would need to do to burn off some of the snacks we have!
