

Year One - Autumn 2 highlights

Throughout the last term we continued to work hard during lessons whilst becoming more independent but also knowing when to ask for help. We also LOVED performing a Nativity!

**LOVE TEAMWORK THANKFULNESS GENEROSITY
PEACE FORGIVENESS EQUALITY JUSTICE**

Maths:

This term we have deepened our understanding of number and learnt how to order numbers, add numbers together and subtracting numbers from each other. We also learnt that you can represent a number using words, pictures and even objects!

We love to use lots of practical equipment to help us with our maths such as multilink, counters, whiteboards and number lines.

Science:

As scientists this term, we have been learning all about the human body, labelling body parts, practising using our senses and finding out about mammals, reptiles, birds, amphibians and many more!

History:

Our historical focus this term has been on comparing everyday objects from the past, with similar ones from today. Did you know that clothes used to just be washed in a bucket?

PE:

During our PE lessons, we have been learning how to use a bat and ball safely and effectively. We even had a go at playing hockey! We also considered the importance of warm-downs and working as a team to achieve a victory!

English:

Our book Cops and Robbers inspired us to create some wonderful pieces of work this term. We continued to work hard to write using full sentences, learning all about adjectives, determiners and nouns. We even got to dress up as a Robber...just for one lesson! We also tried our very best to learn cursive handwriting to ensure that our letters are joined up together. Our communication times have also helped us have some interesting discussions around the themes of friendship, our planet and our own feelings.
