

## Year 4 Autumn 1 Highlights

We have had a fantastic start to Year 4 and have settled in so well! Here are some of the wonderful activities we have been up to...

At the start of the year we measured our heights using string and sealed them in an envelope. We are looking forward to unravelling them later in the year to see how much we've grown!

We have used concrete resources to support our work on place value and addition in maths.

In English, we wrote our own volcano cinquain and kenning poems about Mount Vesuvius. We then developed our computing skills by presenting them using Microsoft Word.

In science, we have been learning about our teeth. We conducted an investigation to examine the effects of different drinks on a tooth-like substance. We decided to use an eggshell as they contain calcium, just like our teeth do!

As part of our Romans topic, we acted as geographers and studied maps and atlases to locate the countries that were part of the Roman Empire.

We loved designing and creating our art project for the Epworth Trust, linked to our class value of 'Forgiveness'. Firstly, we devised our design. Then we practised collaging our design using different materials and textures. Finally, we made our sculptures using clay and added paint. Have a look at our amazing finished products below!
