Westleigh Methodist Primary School – Year 6 Spring Highlights

With God, all things are possible – Matthew 19:26

Love   Teamwork Thankfulness Generosity Peace Forgiveness Equality Justice

I cannot quite believe we're coming to the end of another term! We have worked so hard in Year 6 this term, learning and growing and realising 'With God, all things are possible'.

English

In English, we have been exploring the books: Great Expectations and Room 13. These are two very different genres and we have had so much fun dissecting the characters.
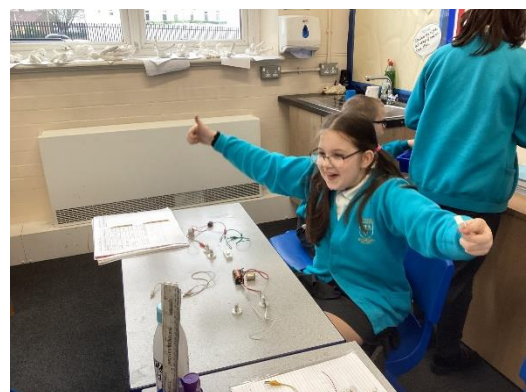

A wedding table appeared at the beginning of spring and we had to use our inference skills to work out what had happened!

Science

In science, we have completed many investigations exploring both light and electricity. We created circuits and changed our variables to investigate the different properties of materials. We tried adding more batteries, whilst ensuring a fair test by keeping everything else the same and we also investigated if adding more bulbs to a circuit made them brighter.

Our scientific knowledge didn't stop there as we also investigated to property of light. We learnt about refraction and how light changed speed when it hit water. This explained why a straw bent in water!

Mathematics

In maths, we have worked so hard and have shown fantastic resilience. We are becoming arithmetic champions and have shown our resilience in tricky reasoning and problem solving questions in the run-up to SATs. We have also had so much fun taking part in different activities during Maths Number Day.

PE

In PE, we have been practising our skills of throwing, catching and movement when in Net games. We also had a visit from Tri Kids, who really tested our fitness in a triathlon based activity. We had to cycle, 'row' and run around the playground. It was tiring but great fun!

PSHE

In PSHE, we continued to get to know ourselves and each other. We created a PowerPoint all about us and presented this to the classroom. We used great oracy and computing skills to deliver this.
